

Why cats are cool: an essay

In this essay I will explain why cats are amazing creatures that deserve our praise. Seriously, if you don't love them by now, this essay will convince you.

Cats are cool because they are fluffy. They can be so squishy that you can put your face on them and it's the most amazing feeling in the world. If your cat doesn't have hair, no worries! Their skin is soft as silk too.

Cats purr. It is scientifically confirmed that the purr has medical benefits. It may even cure cancer and you can even be cured if you die of death.

Cats won't follow you like dogs do. Seriously, why would you want a pet that acts like a slave?

In conclusion, you need cats in your life. They are cute and cool 😊
